ABOUT ME

I am result-oriented **SQA Engineer** with **2.5 years of experience** in testing high-quality **Web and Mobile applications**. I have strong expertise in testing complex **ERP products**, covering critical modules such as **Finance, Inventory, HR, and Production**, ensuring accuracy in ledgers, vouchers, and salary sheets. My background includes working in both **Product** and **Project-based environments**, where I independently managed end-to-end testing for diverse domains like **Banking, E-commerce (OLX-type), and Airline systems**.

I am highly skilled in **Manual Testing, API Testing, and UI/Usability Testing**, with a strong focus on delivering a flawless user experience. Additionally, I have a good understanding of automation concepts and commands with **Git Hub Actions** and **CI/CD** basics. I am currently upgrading my technical skills by learning **Automation Testing using Playwright with Python**, aiming to automate repetitive test cases and improve overall testing efficiency. Committed to ensuring software stability and business logic accuracy.

WORK EXPERIENCE

Sumato Solutions – Lahore, Pakistan

SQA Engineer

[01/08/2024 – Current]

ERP Product Testing:

- I act as the core QA & recently appointed **Lead QA** for a large-scale ERP product used for business management, handling detailed testing of the Inventory and Warehouse modules to ensure stock updates correctly during **Sales and Purchases**. I also verify the **Finance** section(COA, Balance Sheet) , General Ledgers, checking complex calculations for Vouchers, Ledgers, Recovery, and Commissions, while validating the HR module to ensure Salary Sheet generation and attendance records are error-free for **both web and mobile apps**.
- **Automation & DevOps:** I am currently upgrading my technical skills by learning **Automation Testing using Playwright with Python**. I have a good understanding of **GitHub** for code management and **CI/CD pipelines** (GitHub Actions) to run tests automatically.
- **Bug Tracking:** I manage all bugs and tasks using **Azure Boards** (previously JIRA), prioritizing critical financial issues to ensure they are fixed immediately.
- **End-to-End Banking Project:** I single-handedly managed the testing for a Banking Web Application and Mobile Apps (Android and iPhone). I tested features like money transfers, account statements, and bill payments to ensure security and accuracy.
- **API Testing:** I use **Postman** to test APIs and ensure the backend sends correct data to the frontend. I also have a basic understanding of **MySQL** for writing queries to verify database records and data integrity.
- **Bug Reporting:** I manage all bugs and tasks using **Azure Boards**, prioritizing critical issues—especially financial ones—to ensure they are resolved immediately. I write clear bug reports with steps to reproduce, helping developers fix issues quickly.

- **Automation & CI/CD:** I have a good understanding of automation concepts and commands with **GitHub Actions** and **CI/CD** basics. I am currently upgrading my skills by learning **Automation Testing using Playwright with Python**, working towards automating repetitive test cases to save time and improve efficiency.

Project Testing:

- I managed testing for a diverse range of domains, including an end-to-end Banking system (Web and Android/iOS apps) and an OLX-type marketplace. I also worked on team projects like an Airline Management System, a Sports Club Management System, and a Digital Exam Portal.
- **OLX-Type Marketplace:** I independently tested a classifieds app similar to OLX, which included a Website and Mobile builds. I tested features like posting ads, chatting with buyers, and filtering search results.
- **Airline System (Team Project):** I worked with a team to test an Airline Management System. I was responsible for testing flight scheduling, seat booking, and passenger check-in processes.
- **Sports Club Management (Team Project):** Tested a system for managing sports clubs, focusing on member registration, booking courts, and event management.
- **Digital Exam Portal:** Tested a platform where Teachers could create tests, Students could take exams, and Admins could manage the results. I verified that the timer worked correctly and scores were calculated accurately.
- **UI & Usability:** For all projects, I focused on ensuring the applications were user-friendly and the design was consistent across all pages.

Programmers Hut (Remote) – Lahore, Pakistan

Associate SQA Engineer

[06/08/2023 – 31/07/2024]

As a **SQA Engineer** at **Programmers Hut (Remote)**, I contributed across multiple domains, preparing comprehensive **test plans** that defined the testing scope and strategy. I designed and executed **test cases** based on **use cases and SRS documents**, following the **STLC** for efficient **bug reporting and resolution**. My testing experience spans **functional, performance, load, stress, usability, black-box, API, and W3C validation testing**. I conducted **responsive and cross-browser compatibility testing** to ensure seamless application performance across devices and platforms. Additionally, I utilized **Firefox Developer Tools** to debug UI and backend issues and identify root causes effectively.

DevCause – Lahore, Pakistan

SQA Engineer

[01/01/2023 – 15/02/2024]

As a **Junior SQA Engineer** at **DevCause**, I worked on **multiple domain-based projects**, including **GlidDesigns projects, WordPress websites, and CMS improvements**, focusing on **manual functional testing, responsive testing, and UI/UX validation** to ensure system reliability and usability. I created and executed test cases based on SRS and use cases, tracked defects throughout the **STLC**, and verified fixes. I performed **cross-browser, usability, performance (load and stress), and API testing**, and used browser developer tools to debug UI and backend issues. I also supported **basic automation using Selenium**, collaborated with developers using **Jira**, and worked with **WordPress and CMS features**, including content validation and data import/export, to maintain overall system quality.

Internship at Thingtrax – Lahore, Pakistan

Artificial Intelligence Engineer

[01/06/2022 – 30/09/2022]

During my **4-month internship as an AI Engineer**, I worked with Python on machine learning and deep learning models using TensorFlow and PyTorch. I gained hands-on experience in data analysis, basic NLP and computer vision tasks, and supported model deployment while using Git for version control.

EDUCATION AND TRAINING

Bachelor's in Computer Science

Qarshi University [14/09/2019 – 07/07/2023]

City: Lahore | Country: Pakistan | Website: <https://www.qu.edu.pk/> | Field(s) of study: Computer Science | Final grade: 3.9/4.0

Supervisor: Dr. Aamir Majeed

Semester Projects

Final Year Project (FYP) – Digital Campus (Python & Django):

Developed a digital campus system using Python and the Django framework. The system improved university operations by providing centralized access to information and better communication tools for students and staff.

Travel Agency Website Project:

Developed a travel agency website using HTML, CSS, and JavaScript for the frontend, and PHP with MySQL for the backend. The website allowed users to browse destinations, view travel services, and make secure online bookings through a user-friendly interface.

Bus Ticket Booking App (Java, XML):

Created an Android mobile application using Java and XML for bus ticket booking. The app allowed users to view bus routes, select seats, and complete bookings securely, improving the overall user experience.

SKILLS

Software Testing / Agile (Scrum) / Software Testing Life Cycle (STLC) / Test Strategy and estimation / Test planning / Test Management / End-to-end testing / Web Application Testing / Defect Management / GIT (GitHub)

OS/Softwares

Windows / macbook / Linux / Android / iOS / Windows, Ubuntu, iOS / CI/CD

Automation

Playwright / Python / Version Control / GitHub / GitHub Actions

Types of Testing

Manual Testing / Functional Testing / End to End Testing / Regression Testing / Mobile App Testing / API Testing / Responsiveness Testing / Cross Platform Cross Browser Testing / Automation Testing / Integration Testing / UI/UX Testing / Smoke Testing / Sanity Testing / User acceptance testing / UI Testing

Defect Tracking & Management

Azure Board / Jira

API & Database Tools

Postman / MySQL

RECOMMENDATIONS

Name: Muhammad Kaif | Team Lead in ERP

I have worked closely with Muqadas Rasheed on **ERP projects** and have known her for 1 year. Her collaboration with the team is excellent, and she consistently shows strong leadership abilities while delivering high-quality work. I strongly recommend her for any role where professionalism, teamwork, and technical expertise are valued.

Email: kaifm1495@gmail.com | Phone number: (+92) 3056804790

Name: Haroon Jamil | Senior WordPress Developer

I have known Muqadas Rasheed for several years. She is wonderful in her dedication, attention to detail, and expertise in QA and software testing. I strongly recommend her for any role where professionalism and technical skills are valued.

Email: haroonjameel001@gmail.com | Phone number: (+92) 3044088033

Name: Dr. Aamir Majeed Chaudhary | Assistant Professor

Relationship: I have known Dr. Aamir for four years. He was my two-course instructor and my FYP supervisor.

I have known Muqadas Rasheed as her instructor and FYP supervisor. She has demonstrated exceptional analytical skills, dedication, and the ability to complete complex projects with excellence. I strongly recommend her for any role that values professionalism, technical expertise, and commitment.

Email: aamir.majeed@qu.edu.pk

Name: Mr. Shavez Mushtaq | Assistant Professor

Relationship: I have known Shavez for Three years. He was my 4-course instructor, lab organizer & trainer.

I have known Muqadas Rasheed for 2 years. She is exceptional in her analytical skills, dedication, and ability to deliver high-quality work. I strongly recommend her for any position where professionalism, technical expertise, and a strong work ethic are valued.

Email: shavez.mushtaq@qu.edu.pk
